

Siren Information

The village has updated our warning sirens. Sirens are now activated by Fond du Lac County. The sirens on the north end of the village and at the firehouse will sound off for 3 minutes when there is a tornado warning. The tornado warning is a long straight tone.

On Saturdays the county tests this siren at noon for 3 minutes.

For FIRES: The fire siren will tone up and down and will only sound at the firehouse location between the hours of 8am and 8pm.

We will continue to have the noon whistle siren sounding from the firehouse location Monday thru Friday and Sundays.
